

CHRISTOPHER PEACOCK

CLASS OF 2013

Christopher Peacock is an internationally recognized cybersecurity expert and a graduate of Tallahassee State College's inaugural Applied Cybersecurity Program. Currently serving as a Distinguished Engineer at Verizon, he has held pivotal roles at SCYTHE, Raytheon Intelligence & Space, and General Dynamics, safeguarding critical sectors such as defense, finance, energy, healthcare, and technology. His expertise spans threat hunting, cyber threat intelligence, adversary emulation, detection engineering, and purple teaming.

Renowned for his contributions to the global security community, Peacock authored *The TTP Pyramid*, a widely adopted model for understanding cyberattack methodologies. He has helped shape key frameworks like MITRE ATT&CK and contributed to collaborative initiatives such as LOLBAS and Sigma, which enhance threat detection and response capabilities. As a sought-after instructor and speaker, he has trained thousands of professionals and presented at top-tier conferences including Black Hat, DEF CON, and SANS HackFest. His credentials include certifications like GCTI, GCFA, GCED, eJPT, CSIS, Security+, and Network+.
