

AI INNOVATIONS SUMMIT

JUNE 16-17, 2026

TSC

**TALLAHASSEE
STATE COLLEGE**

ABOUT THE AI INNOVATIONS SUMMIT

The AI Innovations Summit, hosted by Tallahassee State College in partnership with the Greater Tallahassee Chamber of Commerce, is a premier two-day convening focused on the future of artificial intelligence and its real-world impact across industries.

Bringing together leaders from education, business, government, healthcare, and technology, the summit creates a dynamic space for collaboration, insight, and innovation. Through keynote sessions, panel discussions, and live demonstrations, attendees explore practical applications of AI, emerging technologies, and the evolving workforce landscape.

Building on the success of its inaugural year, the AI Innovations Summit has become a catalyst for regional progress—sparking meaningful conversations and driving initiatives like the “Future Ready Tallahassee” series, which continues to prepare our community for an AI-enabled future.

At its core, the summit reflects Tallahassee State College’s commitment to equipping students and the broader community with the knowledge and skills needed to lead in a rapidly changing world. AI is not just a trend—it is a tool for empowerment, and this event positions our region at the forefront of that transformation.

AUDIENCE

The AI Innovations Summit attracts a forward-thinking and highly engaged audience of professionals who are actively shaping how artificial intelligence is understood, adopted, and implemented across industries.

Attendees include business leaders, executives, entrepreneurs, educators, technologists, and policymakers, many of whom are decision-makers within their organizations. Representing key sectors such as healthcare, government, education, and technology, this audience brings together those responsible for driving innovation, workforce development, and strategic growth.

From C-suite leaders to emerging talent, participants share a common goal: using AI to improve outcomes, increase efficiency, and stay competitive in a rapidly evolving landscape. They are not simply learning about AI. They are evaluating solutions, building partnerships, and making decisions about how to integrate it into their work.

Guests value content that is both strategic and actionable, with insights they can immediately apply. For sponsors, this creates a powerful opportunity to engage directly with a highly relevant audience while positioning your organization as a leader in innovation and connecting with the people and institutions shaping the future of our region.
