

Amanda B. Wallace
Director, TSC Online

Online Teaching Certification and PD

Project Description

This project combines asynchronous training with face-to-face development to help faculty design engaging, accessible, high-quality online courses through structured learning and authentic evaluation.

Project goals:

- Build expertise in online design and instruction
- Ensure accessibility and quality standards
- Strengthen student engagement
- Create a consistent culture in online offerings at TSC

Rationale:

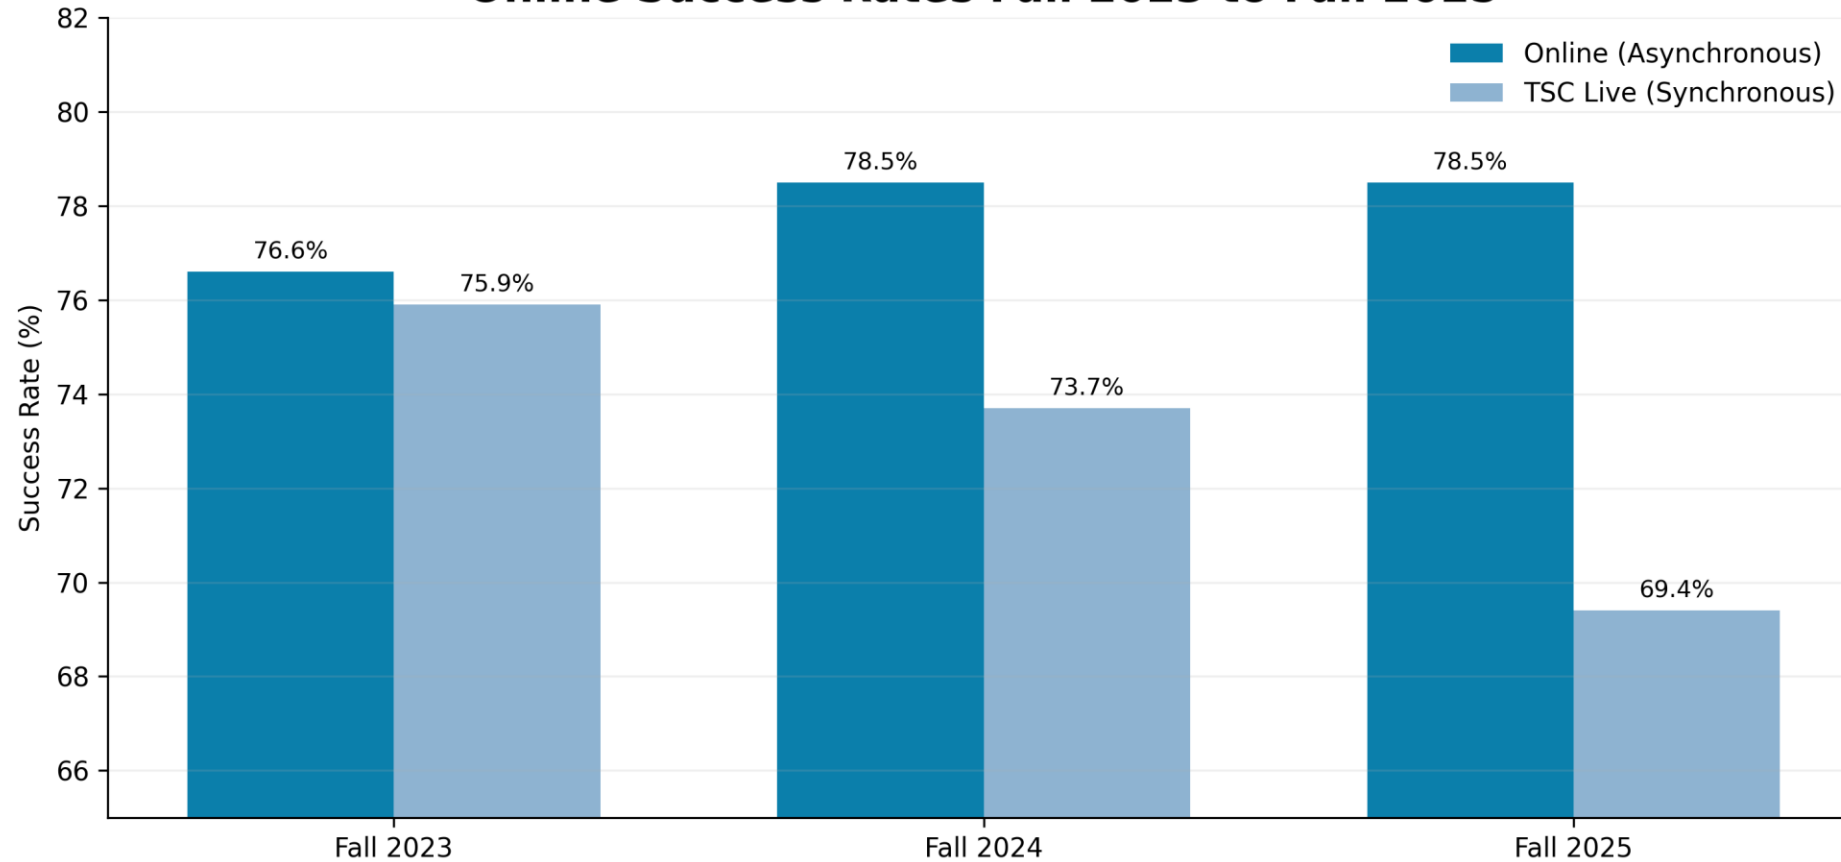

Online learning is expanding rapidly, yet many faculty lack formal training. Well-designed courses improve engagement, retention, and satisfaction—making faculty training essential for quality and student success.

- Over **30%** of students take at least one online course, increasing the need for trained online instructors
- Consistent online course design and instruction standards strengthen accessibility and quality assurance
- Investing in faculty development supports institutional effectiveness and student success

The logo for TSC (Teaching Support Center) features the letters "TSC" in a bold, white, sans-serif font. The letters are set against a dark blue rectangular background. To the left of this blue rectangle is a vertical yellow bar, creating a high-contrast visual element.

Online Success Rates Fall 2023 to Fall 2025

Call to Action

Building Excellence in Digital Learning

By committing to intentional training and continuous improvement, the institution can build a strong foundation for excellence in digital learning.

- S** Support the launch of the online certification program as a strategic institutional initiative
- F** Empower faculty with the tools and training needed for high-quality online instruction
- A** Advance student success through engaging, accessible, and consistent online learning experiences
- C** Commit to continuous improvement to sustain excellence in online education
