Accreditation, OEI

Enhanced Program Review

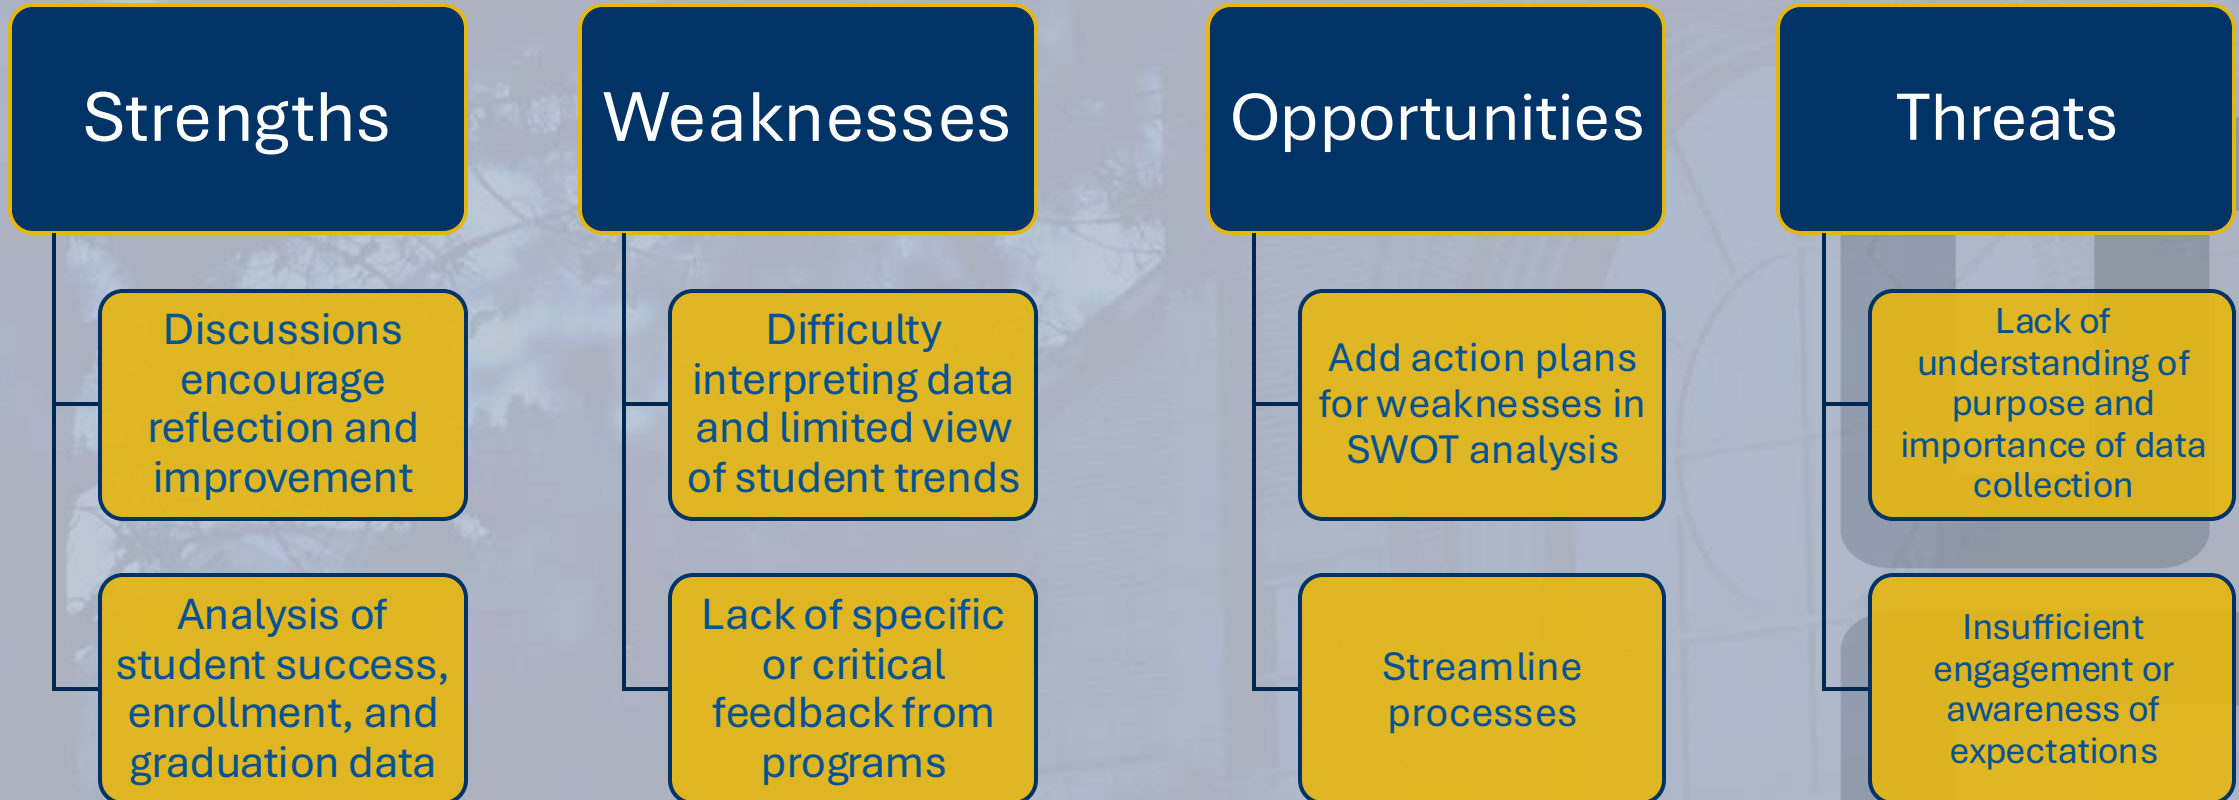

Project Description

- **Assessed** current academic program review practices
- **Identified** gaps in data literacy, access, and support among stakeholders.
- **Developed** and piloted a more robust program review process to support data-informed decision-making.

Rationale

- Current process meets compliance requirements, but compliance doesn't always mean that it's meaningful. More can be done.
- Follow-up on implementation of review findings is limited.
- Leveraging accurate data can enhance program effectiveness, increase enrollment, and improve student outcomes.

Capstone Progress

Future Recommendations for Continuous Improvement
